

CAREER PROFILE

Experienced Ruby and Golang developer who found his passion in management. I am driven by servant leadership, empathy and mentorship to enable people to do what they can do best. Since I founded and led the development in multiple startups, I know well how to deal with stakeholder management and products prioritisation. Built and adjusted development processes for internal and remote teams, so I truly know how to build the communication bridge between different departments and make the near- or offshoring work in your company. Always looking for amazing challenges!
